EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments:

Hi,
I am a medical toxicologist in Denver. A medical toxicology fellow-in-training from the University of Massachusetts has contacted me because they are interested in metal levels in the population downstream from the Gold King Mine release. I am not involved in any activities regarding this issue so I thought I would check with you to see if you had any interest in this Fellow working on this project with you.

Thanks!

Jeffrey Brent, MD, PhD
Distinguished Clinical Professor of Medicine
University of Colorado
School of Medicine
